Grief, Mourning & Bereavement

Presented by Hospice Chaplain Jonathan Carl, MA

That which makes us strong can also be our very weakness. People all cope differently and there is simply no ideal way of coping. We may face depression and pain only to ultimately heal. The way we experience grief, mourning and bereavement is based on our personality, the nature of our relationship with the deceased, and our spirituality, to name only a few. Chaplain Jonathan Carl will define grief, mourning, and bereavement, list stages of grief, and identify effective methods for supporting grief.

*Dinner and one CEU provided for Administrators, Case Managers,
Counselors, Social Workers and Nurses.*
